**DETAILED ACTION*****Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: none of the prior art, including the main reference, GOUGH et al, US Patent No. 5,559,942, for independent claims 1, 10, 16 and 22 expressly teach or suggest (as noted by the applicant on page 12, lines 26-27) the following substantially similar feature, "...responsive to receiving a user input in the second graphical widget, removing the second graphical widget from the display". Further, PERLIN et al, "NESTED USER INTERFACE COMPONENTS", NYU Media Research Lab, Department of Computer Science, 719 Broadway, 12<sup>th</sup> floor of New York City presented at the **Proceedings of the 12th Annual ACM Symposium on User Interface Software and Technology**, November 7-10, 1999, Asheville, USA. **ACM**, disclose an interactive nested/hierarchical interface that includes use of zooming (page 14 column I) and use of multiple views (page 14, column II), as well as interactive widgets (page 16, column I and II (see the last and first paragraphs of each column respectively), however, does not suggest, "...responsive to receiving a user input in the second graphical widget, removing the second graphical widget from the display". Therefore, because none of the cited prior art either alone or together reasonably teach or suggest the combination of steps leading up to, including and coming after the cited feature, the instant application meets necessary conditions for allowance.
